1. How to Access SVN

Repository URL: As given by instructor or Tech Lead.

Login ID : As given by instructor or Tech Lead.
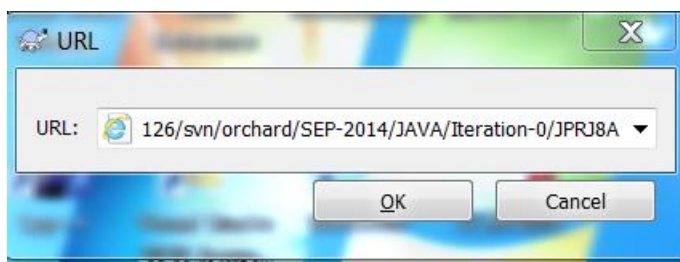

Password : As given by instructor or Tech Lead.

2. Steps to Checkout code from the repository

**Just Right click on the desktop**

Got to Tortoise SVN and Repo Browser and copy the url of the project in which u are in

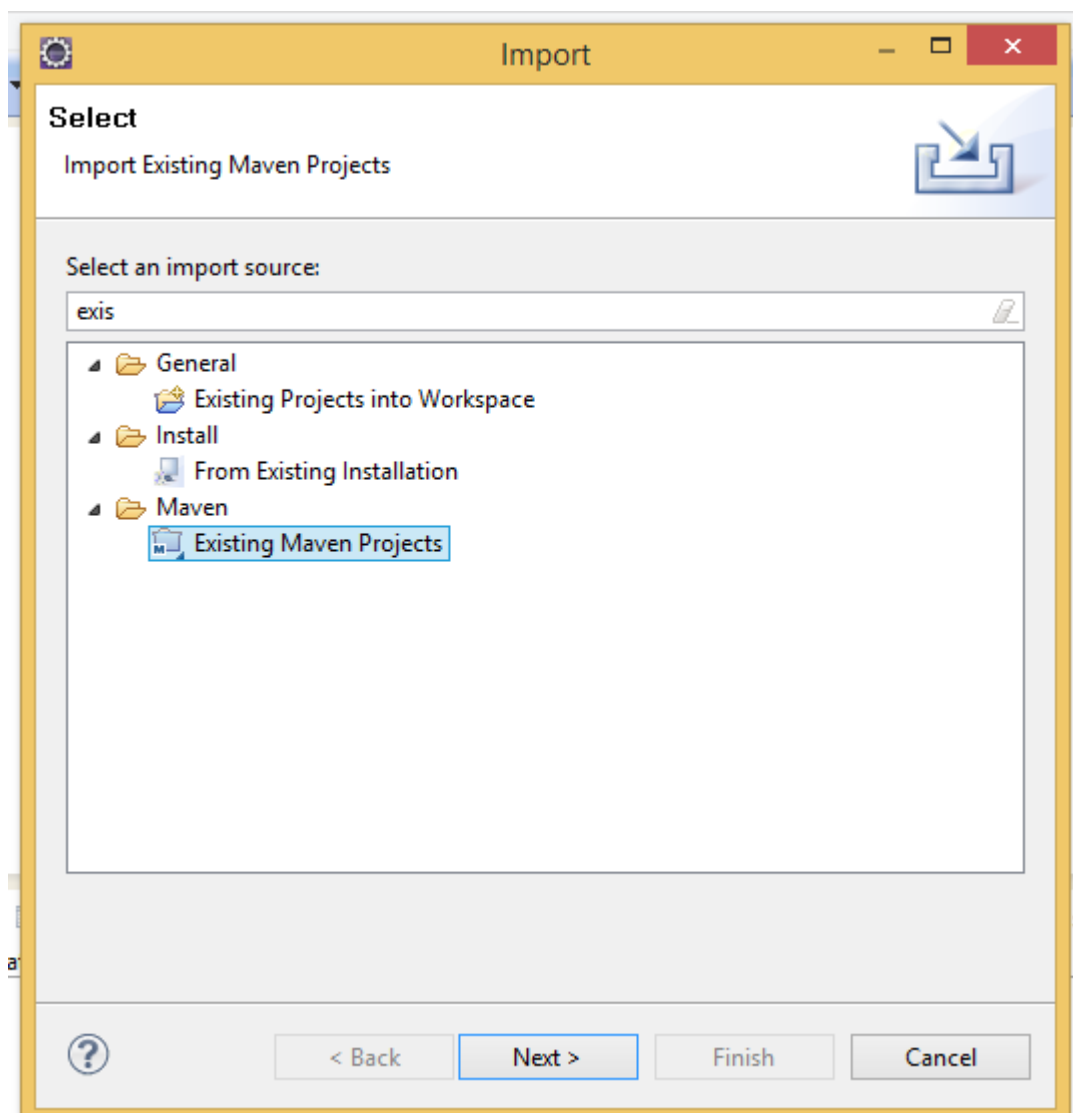

Please note the URL which is specified
makes sure it is https not http

3. Open MySQL and create a database (Name can be of your choice e.g **happytrip_itr2**)
## 4. Open Eclipse
## 5. Select a workspace

6. Click on File -> Import

7. Click on Existing Maven Projects into workspace

8. Browse to the folder where you have checked out the code

## 9. Click OK -> Finish. Now it will build the workspace

## 10. Now Change the database credentials in the following file

\src\main\resources\data\data.properties

| |
|---|
| \src\main\resources\spring\security-context.xml |

| |
|---|
| \src\main\resources\META-INF\persistence.xml |

## 11. You will be able to see following things in explorer

## 12. Add a Server to Run HappyTrip

13. Select Tomcat 7.0

### 14. Click Next, Browse to the Tomcat location

**15. Right Click on happytrip -> run as -> run on server**

16. Select happytrip to run on server

17. Click Finish

18. Your HappyTrip is Up and Running

If you are having problem

Right Click on happytrip -> Properties -> Java Build Path -> Source

Check you have all the folders or not, if not just add it
